#readytowork #webdeveloper #php #laravel

Hello. I am Vorisov Firuz Zafarovich, born in 1997 in the city of Penjikent in Tajikistan. In 2014 I entered the "Technological University of Tajikistan" as a software engineer. Due to the fact that I was interested in building websites, I learned the necessary technologies to help create a good website. In 2017, in my third year, I got a job at Rebus as a Web Programmer Assistant. I put my theory into practice and thus strengthened my knowledge of programming. In one year at Rebus, I learned how to work in a team and learned Framework Yii and JQuery, as well as the Git version control system. During this time, three projects were completed with the team, among which one was a rather large project. In the development of projects, I participated in the server side of the application and also in the client side of the application. In 2018, after graduating from university, I came to study in Russia. I entered the Moscow Institute of Electronic Technology as a software engineer. I am currently studying and working. At work, we use Yii2 Framework, Laravel and other technologies. I study and develop my skills to stay up to date with the latest technology.

WORK EXPERIENCE

Web Programmer

DEV-AIR - Moscow

November 2018 to August 2020

When I flew to study in Russia. I had more free time. I found this job there and was working as a web programmer. I love this job. I worked with a great team. Here we used Laravel Vuejs and October CMS for blogs and FAQ. I graduated from university in 2020. Now I have arrived in Tajikistan. I am studying for a PhD doctorate. I have more free time. I'm ready for new experiences.

Web Programmer Assistant

LLT Rebus - Dushanbe

June 2017 to September 2018

This is where I started my career as a web programmer assistant. I learned more about development. When I left for Russia, I had to leave this job.
